

**1176.01 RADIO AND TELEVISION ANTENNAS; SATELLITE DISHES.**

(a) Erection of Satellite Earth Stations. No person shall erect a satellite earth station (dish-type satellite signal-receiving earth station) in the City without first obtaining a permit therefor, and no installation or erection shall commence before a permit is issued.

The Building Commissioner shall issue such permit, provided the applicant submits a written application therefor upon forms provided by the Building Department. Two sets of plans shall be submitted with such application, showing the exact location of the proposed earth station; the location of all buildings on the subject lot and distances from the earth station to abutting residences; a description of the kind of earth station proposed; specifications for installation, including materials, complete dimensions, support structure details, the location of supporting guy wires, if required, and utility wires, and plans of landscape screening.
